Note: This brochure shows the information known at the time of printing. It does not constitute a binding document under any circumstances. Despite the care taken in preparing this document, printing errors may still occur. We reserve the right to modify fittings and improve products in the current year's models without prior notice. Some vehicles are shown with special or optional features which are listed in the corresponding price lists and available at an additional cost. Style items and decorations used to embellish the visual presentation of this catalogue are not included in the actual vehicle nor in the delivery service. The available payload is the difference between the Maximum Technically Permissible Laden Mass (MTPLM) and the Mass in Running Order (MRO). The latter includes the vehicle, its bodywork, furniture, standard fittings, 90% full fuel tank, full gas cylinder, driving capacity fresh water tank, empty waste water tanks, required fluids and a driver (75 kg). Ensure that the maximum weight permitted is never exceeded (total and per axle). Important: installed optional fittings and accessories are not included in the motorhome's MRO. Consequently, they will systematically reduce the available payload and potentially reduce the number of driving seats. Contact your dealer, who will be happy to provide you with an accurate definition of the models available in each country. Before submitting your order, please contact a dealer for information about the current product and collection status. Information about the vehicle's delivery, appearance, performance, dimensions and mass correspond to the information known at the time of printing. Those details and tolerances comply with European regulations (EU 1230/2012), however they are subject to change up until the time of vehicle purchase or delivery. They may change throughout the course of the year. All photos were taken in accordance with local regulations, whether on the road, in private areas or inside campsites.
