PERFORMANCE FOR YOUR TRIPS

Performance lets you go further.
Lets you stay a little longer.

With a Pilote, performance is not measured
by speed, but by what becomes possible.

When you control the road,
when comfort endures,
when technology endures over time,
then choices expand.

You'll never see the
weather the same way.

You'll never wait for the right season.
You'll never shorten your trip again.
You'll get more out of it.

Spring comes earlier.
Autumn stretches out.
Travel further without
even noticing it.

WHY CHOOSE PILOTE?

+ Made in France

Our panel vans are designed and built in Western France. From structure to finish, every Pilote is born of our expert know-how.

+ 65 years of expertise

Since 1962, every new Pilote model brings an opportunity to improve. Not with time, but thanks to the choices we make.

+ Tests and Quality

Before taking you on the road, Pilote panel vans are subjected to rigorous quality control inspections. We especially subject our prototypes to intensive testing on endurance tracks and in cold rooms, to assess their behaviour under extreme conditions, a demanding approach that continues throughout the assembly process.

+ Across Europe

The French market leader, present throughout Europe, Pilote has a network of expert dealers who will support you wherever you are.

+ Designed for your use

Optimised volumes and a rigorous process for selecting reliable equipment means that Pilote panel vans offer the best possible level of performance, however you choose to travel. Every space is designed to combine comfort, practicality and ease of use.

+ Comfort for every season

Every Pilote integrates high performance insulation to guarantee optimum thermal comfort all year long. The design and materials used ensure constant thermal efficiency, in summer as in winter.

NEW DESIGN FOR 2027

NEW DESIGN

For the 2027 collection, Pilote panel vans are adopting a new, more modern, interior design that brings even more comfort to everyday use. In line with our expertise, Pilote offers carefully designed vehicles, inspired by home design trends, with a bright and warm feel about them.

Our biggest novelty comes from the new harmony between materials and colours, bringing together wood and white surfaces to enhance the feeling of space and light onboard. Finishing touches with metallic reflections serve

to highlight lines and modernise the entire living space.

Continuous lines between the various areas creates what is truly a fluid and functional living area where the cab quite naturally fits into the lounge area. Storage is built-in, clean lines and carefully designed details, for an interior that is both modern, practical and welcoming.

Designed so that you can stay closer to the essentials: more comfort, more style, more life aboard. Ask for more.

Quality materials

- + European poplar is the wood selected for its light weight and strength.
- + Furniture designed and assembled in France.
- + Textiles inspired by the world of home furnishing, easy to clean and abrasion resistant.
- + Bench seats made in France, with high density foam.
- + An acrylic washbasin, scratch and impact resistant, designed in Italy.

MODEL V600G

TRANSVERSE BED

The ideal compromise
between comfort
and compact size

The V600G stands out with its balance between comfort and compact size, offering a flexible format suited to a range of uses. Its transverse bed ensures an optimised interior layout and fluid organisation of the living spaces. The best-seller in the range, it combines optimised volumes with everyday ease of use. A balanced model, designed to meet the needs of travellers using a panel van.

+ Available in **ÉVIDENCE**

Strong points

- + Large 150 × 194 cm transverse bed with Froli star base and comfort mattress.
- + The new bathroom with its removable wall form a clear separation between the toilet/washbasin and shower space. Separate, it benefits from a skylight that brings light and ventilation, with the ability to add an optional window for more light.
- + A comfortable lounge for 4 people. A high density foam bench seat, pivoting cab seats and a table with a pivoting extension that can be stored in the podium to make it easier to move around.

MODEL V630J

TWIN BEDS

Comfort and space onboard

The V630J is based on a design that brings true living space aboard. Hence, the layout especially highlights a roomy bedroom with a large comfortable bed, easily accessible from both sides. At the rear, the large modular storage area, with a small rising bed, offering a generous amount of storage space, ideal for carrying bulky equipments, including bicycles.

+ Available in **ÉVIDENCE**

Strong points

- + Large twin beds with additional bedding. A comfortable mattress and Froli star base for exceptional sleeping comfort.
- + A generous storage area offering plenty of storage space, made possible by the rising beds, ideal for carrying plenty of equipment, including bicycles.
- + A comfortable and bright lounge for 4 people. It includes USB sockets and a 230 V power outlet that are easily accessible, along with plenty of storage space.
- + A large functional kitchen with three large drawers, high cupboards, built-in control panel, compression refrigerator and counter top extension.

MODEL V630S

BUNK BEDS

A highly modular family panel van

The V630S is a family panel van with four extra-large permanent berths, designed to offer a high degree of comfort while travelling. Its ultra-modular design makes it possible to adapt the space to its uses, thanks to a lift-up storage area and sliding beds. A model designed to meet the needs of families using a panel van.

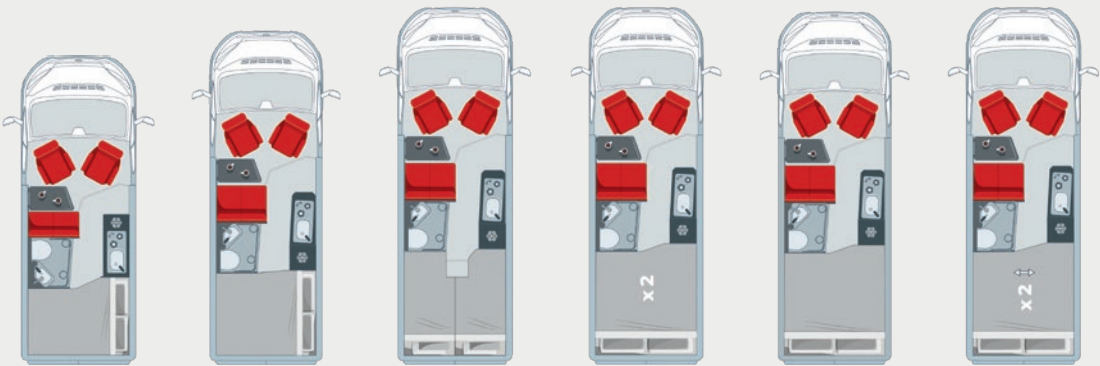

Strong points

- ✚ A family panel van with 4 extra large permanent berths, offering truly separate berths.
- ✚ A highly modular panel van that adapts to its uses, able to sleep 2 to 4 people thanks to sliding beds and the lift-up storage area.
- ✚ A bedroom with a system of suitcases to easily prepare your travels from home.
- ✚ A lift-up storage area for bicycles or bulky equipment.
- ✚ A separate and roomy bathroom, with a movable partition wall that creates two really separate toilet/ washbasin and shower areas, lit and ventilated by a skylight.

 Plus points	Compact and manoeuvrable, the V540G has all of the features of a recreational vehicle.	The V600G is the benchmark for panel vans.	The V630J is equipped with twin beds that will satisfy even the tallest of you.	An ultra-modular family panel van with permanent extra-large berths.	The specificity of the V630B is its large lower berth that is very easy to access along with its very large closets.	The V633M with its electric garage bed brings the benefit of and extra-large storage area.
